### Abstract of JP2003266941

PROBLEM TO BE SOLVED: To provide a recording medium and a recording method for multicolor recording which enable repeated recording and erasure of information.

SOLUTION: This reversible multicolor recording medium has a constitution wherein at least one of rewritable layers 11-13 is formed on a substrate 1. The rewritable layers 11-13 are so made that they change reversibly into two states of being transparent and being colored for visible light according to temperature.
